Highlights

This workshop is designed to create a shift in the approach to cancer pain management—moving from mere symptom control to comprehensive, patient-centered care.

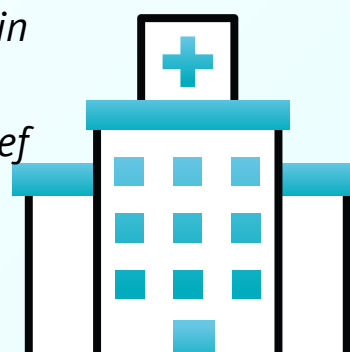

Benefits of Attending the Conference

- Pain management is vital but not sufficient for full relief.
- Patients experience physical, psychological, existential, and social challenges.
- A holistic palliative care approach improves quality of life.
- The workshop will equip pain physicians with essential skills for whole-person care.

Tentative Program

- Introduce the principles and philosophy of palliative care.
- Enhance understanding of symptom management beyond pain control.
- Discuss end-of-life care planning and ethical considerations.
- Clarify legal and regulatory aspects of opioid use (NDPS Act).
- Guide participants in establishing palliative care services within hospitals.
- Address psychosocial challenges, coping mechanisms, and grief support.
- Explore music and complementary therapies as adjuncts to care.
- POCUS for Palliative care
